

SUPPLY CHAIN VULNERABILITY REPORT

Generated by VulnMap
Date: 5/19/2026
Stack Name: demo-ecommerce-api

Executive Summary

Failed to generate executive summary due to API error. The current tech stack presents notable supply chain vulnerabilities that require immediate attention. Critical nodes must be patched or isolated to prevent potential data breaches or service disruption. A thorough manual review of the identified high-risk packages is strongly advised.

Risk Overview

Overall Risk Score: 51/100

Critical Nodes Priority

1. node-fetch (v2.6.0) - Risk Score: 100

Trust Depth: 12 | Type: npm

Top CVE: GHSA-r683-j2x4-v87g - HIGH

2. minimist (v1.2.0) - Risk Score: 95

Trust Depth: 11 | Type: npm

Top CVE: GHSA-vh95-rmgr-6w4m - HIGH

3. marked (v0.8.0) - Risk Score: 90

Trust Depth: 10 | Type: npm

Top CVE: GHSA-5v2h-r2cx-5xgj - HIGH

4. ws (v7.4.0) - Risk Score: 85

Trust Depth: 9 | Type: npm

Top CVE: GHSA-3h5v-q93c-6h6q - HIGH

5. mongoose (v5.10.0) - Risk Score: 70

Trust Depth: 6 | Type: npm

Top CVE: GHSA-9m93-w8w6-76hh - HIGH
